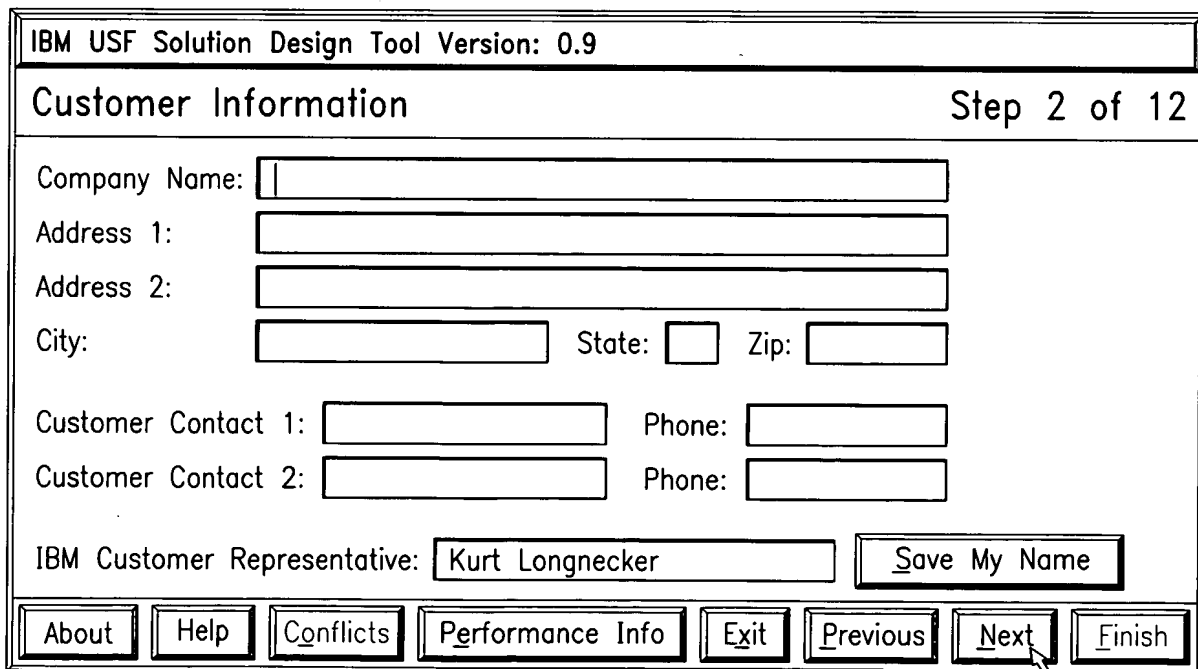

FIG. 5A

A dialog box titled "Design Type Selection". It contains a question mark icon and the text "USF Design Type". Below this is a label "Select Design Type:" followed by a rectangular box containing three radio button options: "Mass Custom" (selected), "Custom", and "Open Existing Record". At the bottom of the dialog are two buttons: "Accept" and "Cancel".

502

FIG. 5B

A main application window titled "IBM USF Solution Design Tool Version: 0.9". The window has a header bar with "Customer Information" on the left and "Step 2 of 12" on the right. The main area contains several input fields: "Company Name:", "Address 1:", "Address 2:", "City:", "State:", "Zip:", "Customer Contact 1:", "Phone:", "Customer Contact 2:", and "Phone:". Below these is a field for "IBM Customer Representative:" with the text "Kurt Longnecker" and a "Save My Name" button. At the bottom is a row of buttons: "About", "Help", "Conflicts", "Performance Info", "Exit", "Previous", "Next", and "Finish".

Dispatcher Server (Qty 2)
key file == NET6MDS0.003

Hardware

- *IBM RS/6000 43P Model 150
- *1 x 375MHz 604e PowerPC Processor
- *512 MByte main memory [2 x 256 MB DIMM]
- *2 x 9 GByte Hard Disk
-[Base Operating System & BOS Mirror]
- *1 x Media Bay Disk Drive Mounting Kit
- *3 x 10/100 Mbps Ethernet NIC Adapters
- *1 x Power Supply Connection

Software

- *AIX Base Operating System (BOS) [current build]
- *WebSphere Edge Server Software Package
-containing SecureWay Network Dispatcher Program

Network

- A Adapter: (100BaseT) External INTERNET (100)
- B Adapter: (10BaseT) WEB to DB Layer + USF Admin (300)
-(Private Firewalled Internet Access)
- C Adapter: (100BaseT) Private VLAN (200)

Web Layer Firewall Server (Qty 2)
key file == FWLN44S0.001

Hardware

- *Nokia IP440 Base System
- *1 x Intel Processor
- *1 x 256 MByte RAM main memory
- *1 x 20 GByte CPCI Hard Drive
- *3 x Four Port 10/100 Ethernet CPCI Interface Card
- *1 x Ethernet Cable (for crossover)
- *1 x Power Supply
- *1 x Power Supply Connection

Software

- *IPSO software (operating system & Checkpoint)
- *Check Point Firewall-1 Enterprise Security Suite
- ... *access Control
- ... *Authentication
- ... *Encryption
- ... *Address Translation
- ... *Content Security
- ... *Connection Control
- ... *Enterprise Management

Network Connections

- A Adapter: External INTERNET (100)
- I Adapter: Firewall to INTERNET Connection (20)
- J Adapter: Firewall Logging (19)
- K Adapter: Heartbeat ()
- Q Adapter: Firewall Tool Resource (18)

Data Base Server MED CLUSTER (Qty 1)
shown as == DB Sun E450 CLUSTER
key file == ADBSCMS0.001

Hardware

- *Sun E450 Server [Qty 2 of these servers]
- *4 x 400 Mhz cpu
- *3072 MByte main memory
- *2 x 18 GByte Hard Disk
-[Base Operating System & BOS mirror]
- *2 x 36 GByte Hard Disk [Cluster Software Usage]
-[ADSM Backup System & mirror]
- *1 x 12/24 GByte 4mm DDS-3 Internal Tape Drive
- *4 x 10/100 Mbps Ethernet NIC's using 2 Quad Cards
- *2 x Power Supply Connection for E450

Disk Expansion Unit w/RAID [Qty 2 of these units]

- *4 x 18 GByte Hard Disk [per unit]
- *2 x Power Supply Connection for Disk Exp Unit
- *Total Hard Disk Storage for client data = 8 x 18 GB
-[4 x 18 GByte available with mirroring]
- ***Administrative Workstation= Sun Ultra 5 w/monitor
- ...with Terminal Concentrator Kit for sharing
- *1 x Power Supply Connection

Software

- *Sun Solaris Operating System (BOS) [current build]
- *Sun Cluster Software & Documentation
- *Sun Veritas File System Software
- *Sun Veritas Volume Manager Software
- to be specified
- *Other software is customer supplied software

Network Connections

- B (100BaseT) WEB to DB Layer + USF Admin (300)
 - D (100BaseT) External BACKEND (400)

Application Server (Qty 2)
shown as == Appl RS6k 6 F 1
key file == ADB6MDS0.301

Hardware

- *RS6000 6F1 MED APP or MED DB
- *2 x 450 Mhz cpu
- *4096 MByte main memory
- *1 x PCI Dual Channel Ultra2 SCSI Adapter
- *2 x 9 GByte Hard Disk
-[Base Operating System & BOS mirror]
- *1 x 4-Channel Ultra3 SCSI PCI RAID Adapter
- *6 x 18 GByte Hard Disk [client data]
-[3 x 18 GByte available with mirroring]
- *4 x 10/100 Mbps Ethernet NIC's
- *2 x Power Supply Connection

Software

- *AIX Base Operating System (BOS) [current build]
- Advanced Ed.of WebSphere Appl.Server
- *Other software is customer supplied software

Network Connections

- B (100BaseT) WEB to DB Layer + USF Admin (300)
- D (100BaseT) External BACKEND (400)

Administration Workstation

Hardware

- Sun Ultra Enterprise Ultra 10 Model 440
- 1 x 440MHz UltraSPARC-III
- 256MB DRAM
- 2x9.1GB 7200 RPM Hard Disk (EIDE)
- 1 x 17in Monitor

Software

- Solaris 2.6

Network

- A Adapter (integrated): USF Admin
(Data Admin (500))

Other Hardware

- 1 x Terminal Concentrator Kit

Fail Over Scheme:

- Server 1 fails over to server #2

EXP200 Notes:

You may need to include the following parts in your EXP200 configuration:

- 03K9311 IBM Netfinity 4.2M Ultra2 SCSI Cable
- 37L5857 Netfinity EXP200 Rack-to-Tower Conversion Kit
- 37L0075 Netfinity EXP200 350W Redundant Power Supply
